Feedback from team member 2:

- Considering the fact that this is our first project and that we are a team of two I am very pleased with the results so far. Communication, collaboration and teamwork have by far being great. Also I can see that Sten has great self-development, self-management and problem-solving skills. Attention to detail has also been good.
- So all in all I suggest to continue doing things as you do.

Feedback

Feedback from team member 1:

- We were a team of two the entire project and it got a bit stressful at times as there were some time constraints. Kristin was very helpful and very keen on finishing the project.
- I can see Kristin becoming a great QA engineer in the long run once she feels more comfortable with confluence and Jira as these are the key programs a lot of firms use.

- Also I can't stress enough how good the communication and teamwork has been and that even when times were crazy considering real life, Sten always maintained positive.
- I'm sure that every team would appreciate a member like Sten, who is not only great to work with, but also a very nice person to just talk and have a laugh.

Feedback

Feedback from team member 1:

- I feel like Kristin was beacon for this sprint if things started going sideways (deadlines closing) as she was very eager to go for the extra mile to get everything done.
- Although we were only two people managing the project, I'm glad it was with Kristin as not only she's easy to communicate with work wise, we also had many laughs talking about our everyday lives.
- I'd suggest Kristin to keep having the positive outlook she has had throughout the course so far.
